MORE ROSIN BETTER ROSIN

TO TURPENTINE OPERATORS:

Five to ten per cent of the gum brought to the still is wasted.
The average producer loses five barrels of rosin for every
hundred that he makes.

YOU CAN EASILY SAVE MUCH OF THIS LOSS

Keep chips, bark, and dirt out of the gum.
Make your chippers carry paddles and place them over each
cup or box while putting on a streak.

DON'T PAY GUM PRICES FOR TRASH

When your gum is full of chips, bark, and dirt, you are
paying your dippers, drivers, and stiller for handling this
worthless trash.

For every pound of trash in the gum, you lose more than a
pound of rosin, which sticks to the trash.

TRASHY, DIRTY GUM MAKES LOW-GRADE ROSIN
